GUSTAVO BEAUREGARD

Querétaro, Mexico · github.com/gus-bn · linkedin.com/in/gus-beauregard · gusb.dev

Full-stack and AI engineer with 18+ years building production systems end to end. I design and ship LLM-powered products—RAG pipelines, vector search, fine-tuned models, and agent orchestration—on high-availability architectures that have served 3M+ monthly active users. Hands-on across Ruby on Rails, Node.js, Python, React/Next.js, and AWS/GCP.

PROFESSIONAL EXPERIENCE

TheGurúCompany (AI SaaS Platform), Mexico 2020 – Present **Lead AI / Full-Stack Engineer**

- Built and shipped three production AI SaaS products—Utoppia, ChatO, and WeWell—from architecture through deployment.
- Designed an AI microservices architecture spanning messaging-channel integrations, data and reference APIs, embedding and vector search, RPA workers, and a custom visual flow builder for chatbots and agent workflows.
- Implemented the LLM layer end to end: model fine-tuning, embedding pipelines, vector database integration, retrieval, and prompt engineering across commercial and open-source models.

Koonol México/Gurúcomm (Telecom SaaS / MVNO), México 2017 – 2020 **Lead Platform Engineer**

- Engineered the platform behind Mexico's first MVNO on Altán's "Shared Network"[1] — mobile apps, CRM, provisioning, and conversion landing pages — reaching 25K active subscribers.
- Built the multi-tenant white-label version of the platform, licensed to multiple Altán Networks operators and shipped as Koonol México, serving 3M+ monthly active users.
- Developed the country's first number-portability API, plus top-up network integrations (convenience-store payments) and prepaid/postpaid provisioning services.

Soluciones Eucledian (Digital Products Studio), Mexico 2012 – 2017 **Senior Full-Stack Developer**

- Built web and mobile products on high-availability architectures reaching 1M+ daily users.
- Delivered custom CRM, ERP, e-commerce, and campaign/operations systems for 50+ clients.
- Owned the full stack: REST API design, data modeling, front-end, native and hybrid mobile, and AWS deployment with CI/CD.

Previous Jobs:

- BNN (Digital Agency), Mexico 2009-2011. Lead Developer
- Yoyo Button, Australia 2008-2009. Full Stack Developer

EDUCATION

ITESM, Santa Fe, México 2013 **Bachelor in Computer Science and Technology**
Completed final semester at MIT's Megacity Logistics Lab, contributing to the "Last Mile" project.

SKILLS & OTHER

AI / ML: LLM fine-tuning, RAG, embeddings & vector databases, prompt engineering, agent orchestration, MCP servers, RPA, n8n workflows
Backend: Ruby on Rails, Node.js, Python, REST APIs, PostgreSQL, microservices, high availability, serverless (AWS / GCloud)
Frontend: React, Next.js, TypeScript, Ember.js, Tailwind CSS
Mobile: Swift / SwiftUI, Kotlin, React Native, Objective-C
Platform: Docker, CI/CD, DevOps, ISO 27001 / SOC 2, Scrum
Also: UI/UX and product design, technical writing
